

Print-n-Play Spaceship Fleet Battle Miniatures

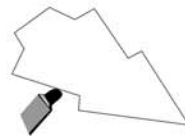

By Matthew Kozikowski
Spaceship Design & Art by James Francis & Sven Olsen

Tips for getting the most out of assembly:

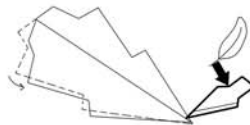

Use a heavy weight paper, 90 to 110 pound should do or cardstock.

Use a black felt-tipped permanent marker to color the white cut edges.

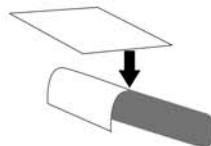

For best results, use a sharp hobby knife. Make your cuts in the middle of the thick black boarders.

Use light pressure with a hobby knife to score straight lines using a ruler. This will make bends crisp.

When changing direction of cuts, over-cut slightly to get crisp corners that are fully cut.

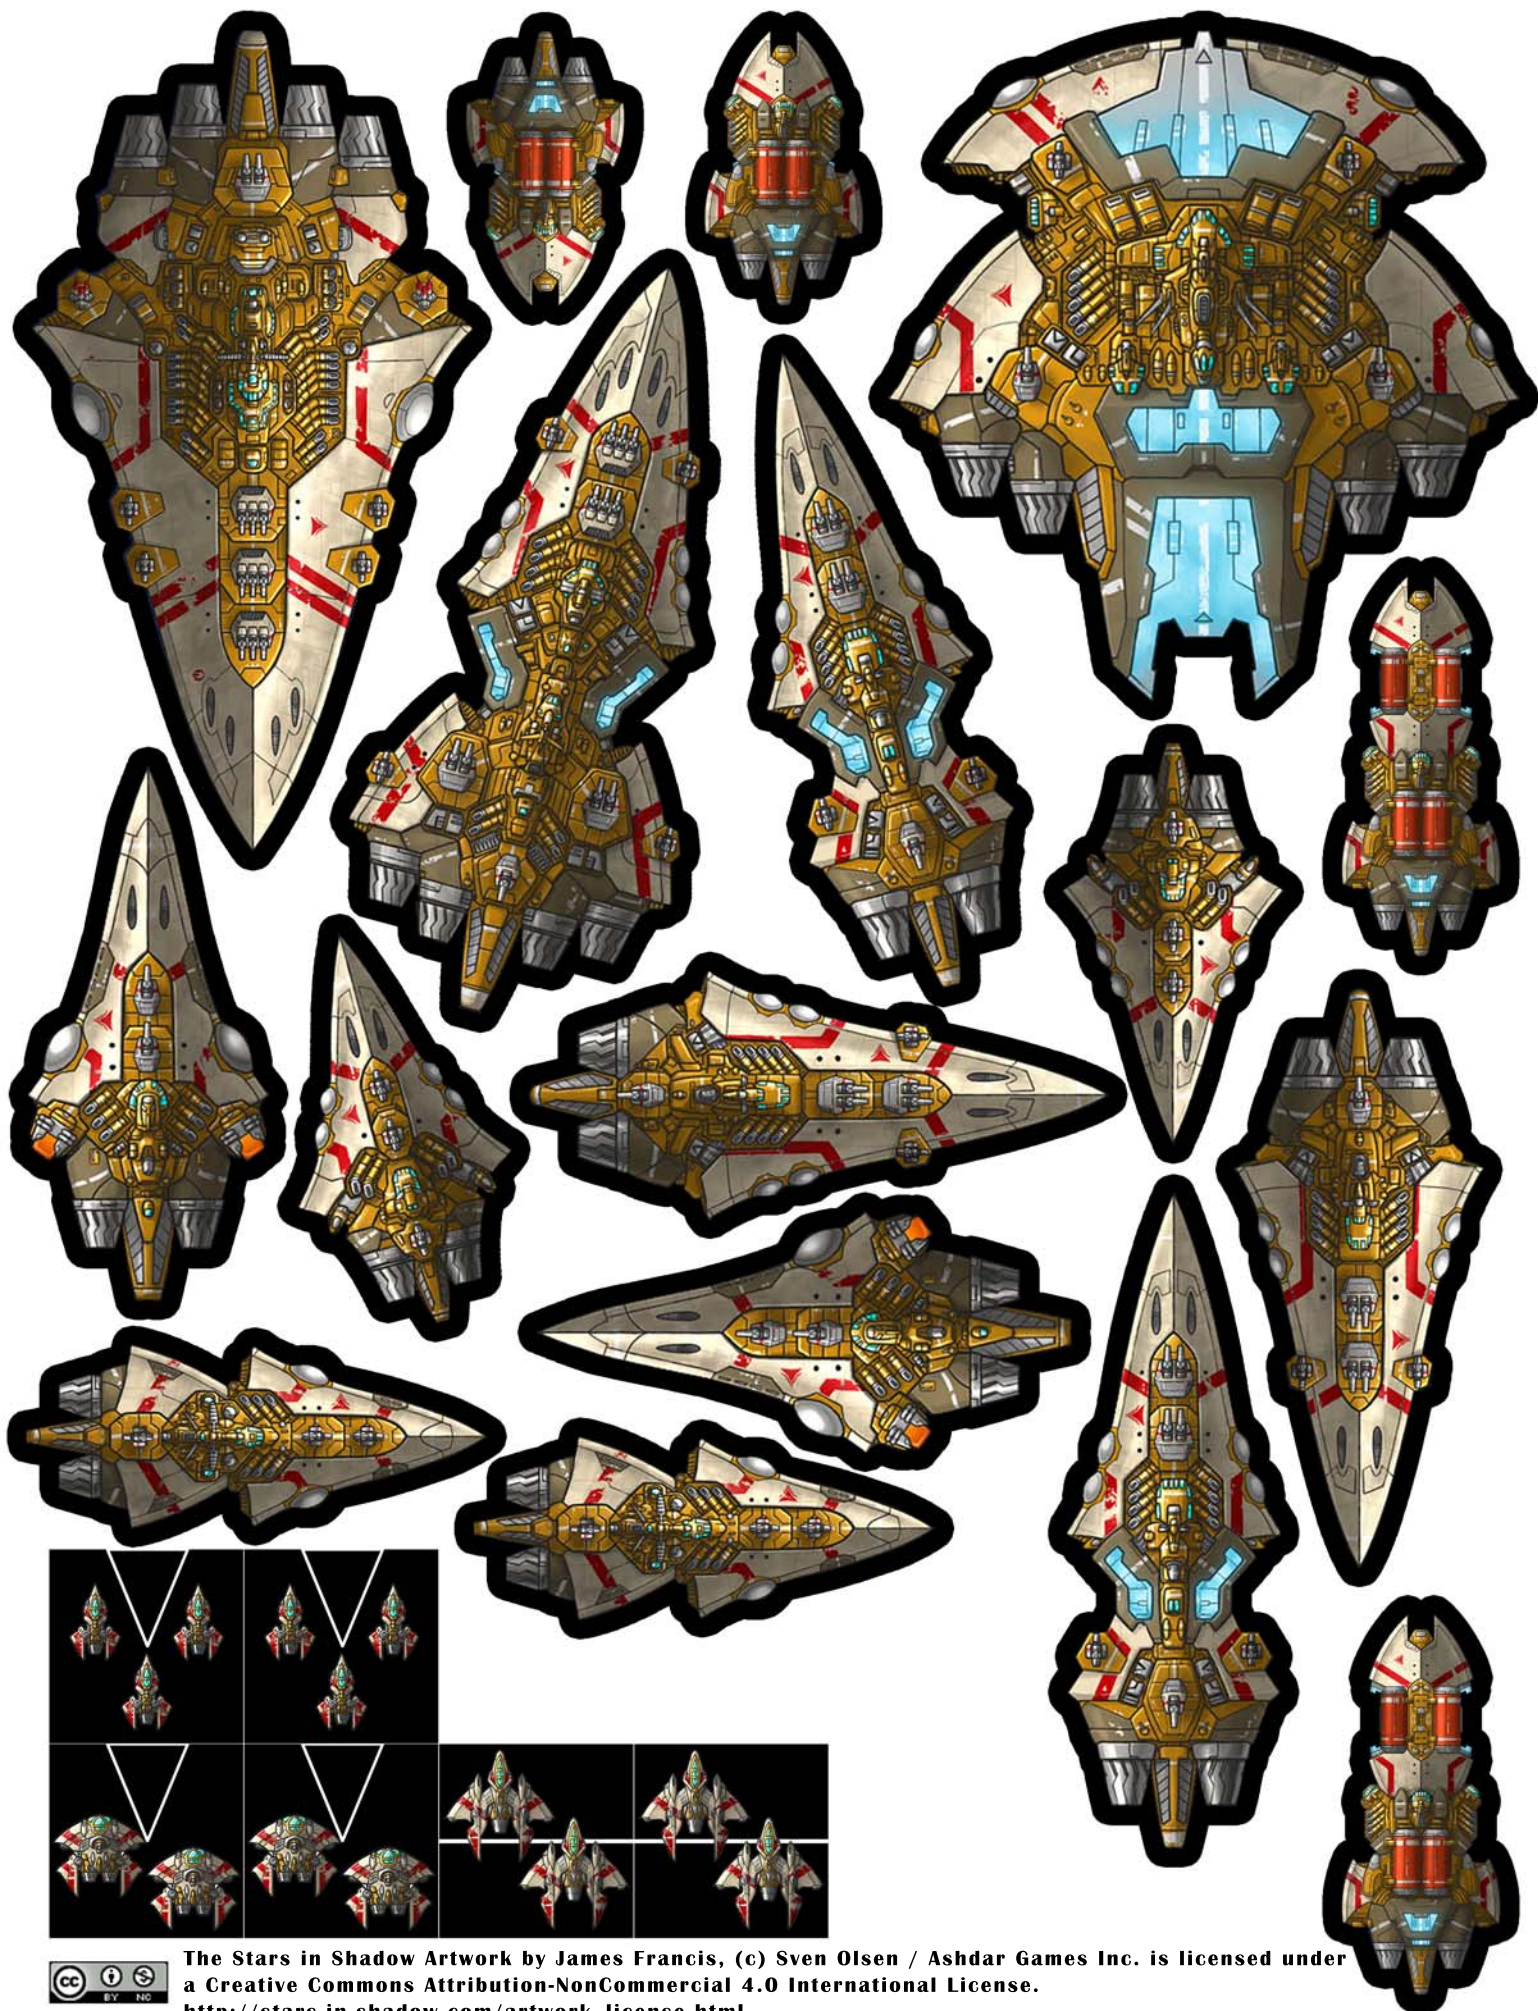

Use a pen or marker shaft and bend the paper over it to create uniform curved surfaces.

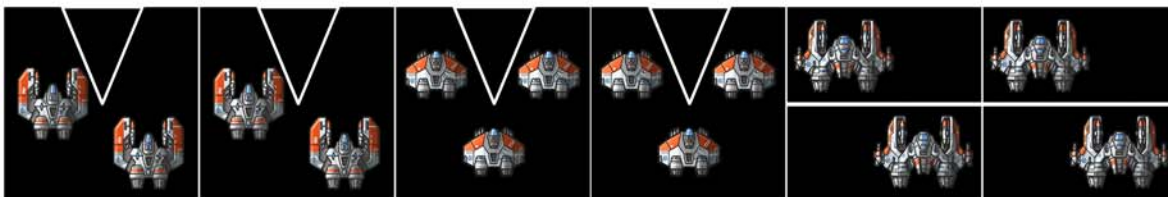

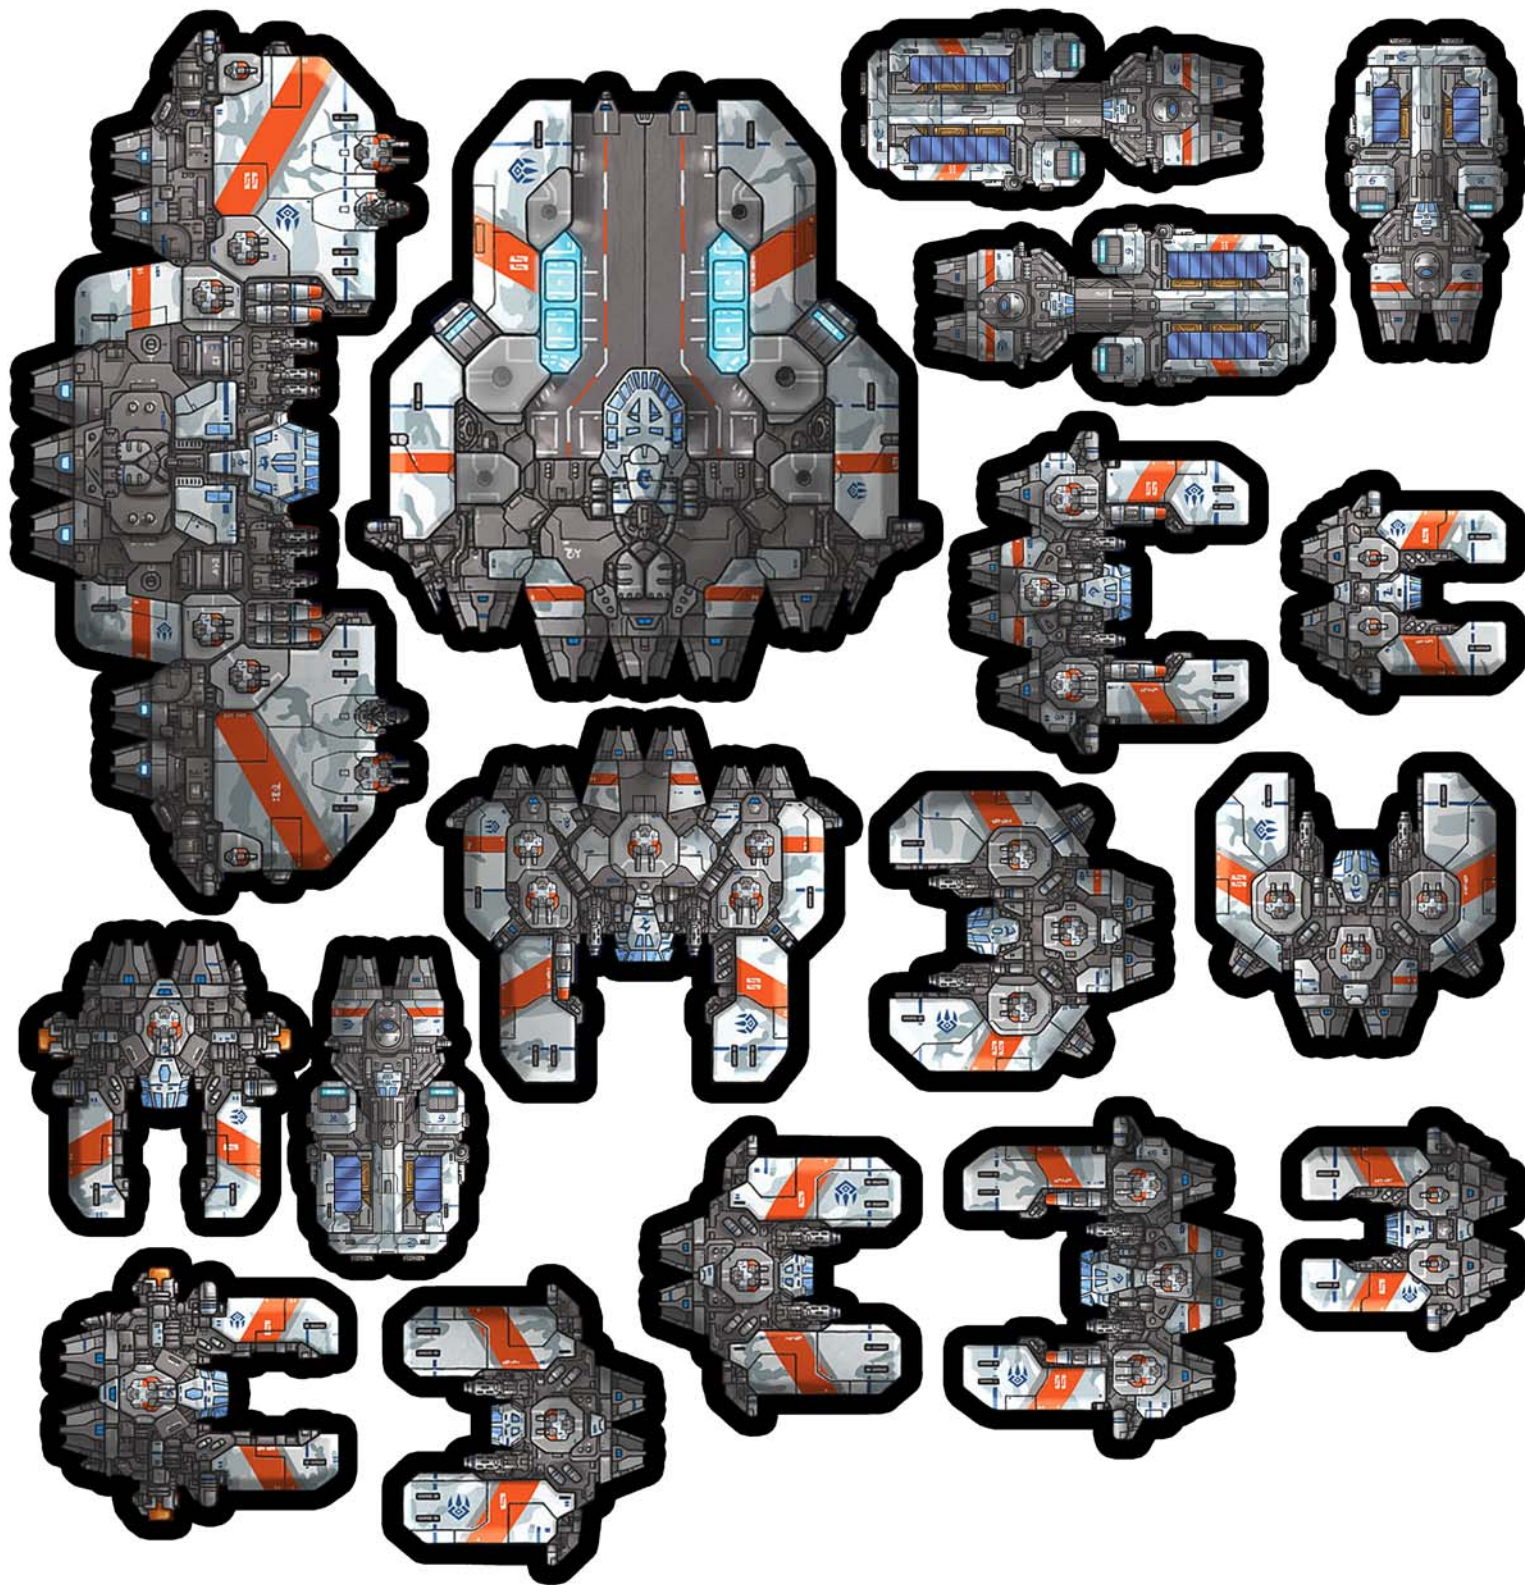

Special thanks to Jim and Sven for use of their great ship art.
